Professional Summary

Results-driven Computer Science engineering student with hands-on experience in AI integration, full-stack web development, and modern software engineering. Passionate about building intelligent and scalable applications using AI technologies while continuously learning emerging software development practices.

Education

B.Tech in Computer Science — VIT University (Vellore)

Aug 2023 – May 2027

CGPA: 8.71 / 10

Technical Skills

- **Languages:** Python, Java, C, C#, TypeScript
- **Web Development:** HTML, CSS, JavaScript, React, Angular, ASP.NET Core, Flask
- **AI / ML:** LLM-based Text Summarization, LangChain, Prompt Engineering
- **Backend:** REST APIs, ASP.NET Core Web API
- **Tools:** Git, GitHub, Linux, VS Code

Experience

AI Intern — Syncfusion Software Pvt. Ltd.

May 2026 – Jun 2026

- Developed full-stack CRUD applications using ASP.NET Core, React, and TypeScript.
- Built RESTful APIs and implemented Role-Based Access Control (Admin/User) for secure authentication and authorization.
- Developed C# console applications while gaining hands-on experience with Git, Agile development, and DevOps workflows.

Projects

MyKitchen — Dish Recommendation Planner

Python, Flask, HTML, CSS (Tailwind), JavaScript, PyTest

- Developed a full-stack web application for kitchen inventory management and recipe planning.
- Built an ingredient-based recommendation engine with cost-effective purchase suggestions.
- Designed a modular architecture and validated application reliability using PyTest and mutation testing.

AI-Based Email Summarizer

Python, NLP, LLMs, LangChain, Prompt Engineering

- Developed an AI-powered system to summarize lengthy email conversations using LLMs.
- Integrated LangChain to preserve conversational context and improve summary coherence.
- Optimized prompts to generate concise, relevant summaries across different email formats.

Certifications

- **Oracle Professional GenAI Certification (May 2025)** — LLM chaining, prompt optimization, Retrieval-Augmented Generation (RAG) workflows.
- **Data Structures and Algorithms (March 2026)** — Recursion, Greedy Algorithms, Dynamic Programming using Java.
